

A HENKELS & MCCOY Group Company

Communications Services

HMI connects communications carriers, telephone companies, and wireless providers to their customers – and their customers to the world. The company's work spans across the communications industry, including carriers, CLEC, independent and government agencies, educational institutions, large venues, and enterprise networks. Providing the highest quality, end-to-end services, HMI builds the robust broadband infrastructure that facilitates connections and fuels the economy across North America.

Bringing experience, innovation, and proficiency to every project, HMI's highly trained communications infrastructure construction and engineering experts deliver smart broadband solutions designed to last for generations. From design and build through project management and maintenance, HMI has earned a reputation for technical expertise, professionalism, and reliability in the delivery of all aspects of broadband, OPC, IPC, and wireless solutions. With a large national footprint, HMI can complete projects quickly and efficiently, while meeting clients' broadband construction and engineering needs safely, accurately, and on time.

Outside Plant Construction

- Material Procurement
- Project Management
- Overhead and Underground Construction
- Cable Splicing and Testing
- Railroad Installation

Inside Plant Construction

- Structured Cabling
- Local Area Networks (LAN) for Multi-use & National Projects
- Moves, Adds, Changes (MAC)
- Passive Optical Networks (PON)
- Distributed Antenna Systems (DAS)
- WiFi
- Small Cell
- Multi-Dwelling Units

Wireless

- New Tower Construction
- Small Cell
- WiFi
- DAS
- Existing Tower Maintenance

Technical Solutions

- Infrastructure Engineering
- Project Management
- Performance and Benchmark Testing
- Equipment Installation
- Site Audits and Surveys
- Multi-site Rollouts

Commitment to Safety

HMI extends safety to every aspect of work. Safety drives the development of impeccable work practices and is at the core of the way behavior is observed, communicated, and investigated. HMI follows a daily safety management system of leading and lagging indicators, including coaching observation trends, work site audits, good catch and near miss reports, corrective action follow-ups, total recordable incident rates, days away, and restricted duty and transfers. With these indicators, HMI performs trend analysis and program validation of safety performance. This vigilant evaluation and implementation of company and industry-wide best practices make certain HMI maintains the absolute highest safety standards to protect our workers, our clients, and the community. HMI's daily mission is to ensure "Nobody Gets Hurt!"

About

HMI is a multi-discipline, privately held firm that designs, builds, and maintains the critical infrastructure of the country. HMI brings extensive industry knowledge, technical excellence, and an integrated approach to engineering, planning, construction, project management, and turnkey delivery solutions for the power, oil & gas, and communications industries. HMI works closely with clients to assess each situation and achieve high-quality outcomes on projects of all sizes and complexity.
