

Wireless Services

HMI provides comprehensive, high quality infrastructure services to fiber, wireline, and wireless carrier clients within the communications industry. HMI brings advanced know-how, exceptional safety standards, and an uncompromising dedication to customer service to each of their extensive areas of expertise.

HMI provides consulting, engineering and design services to deploy and fully support wireless services and technologies to enable transformational communications services such as 3G, 4G, 5G, CRBS, and Private-LTE & IoT. In addition, HMI's wireless services professionals have the capability to develop unique distribution and lifecycle support programs, logistics, and program and project management services to accommodate national roll-outs.

HMI's wireless services team delivers the highest levels of performance and safety on every project. With a large national footprint, the firm has the skills and resources to complete wireless construction and engineering projects quickly and efficiently. HMI is equally committed to completing communications infrastructure maintenance and repairs for customers throughout North America. Clients count on HMI to customize solutions to meet their unique needs and surpass their expectations for quality and value.

Wireless Solutions

- Distributed Antenna Systems (iDAS & oDAS)
- Public Safety Radio Enhancement DAS
- Small Cell Solution (Indoor/Outdoor)
- New Site Design & Construction
- OSP and ISP Cabling, Fiber, and Structured Cabling
- Private Networks, LTE, CBRS, WiFi, 5G NR
- A&E/Make-Ready Engineering Power and Telecom

Technical Solutions

- Turnkey System Integration
- Infrastructure Engineering
- Project Management
- Construction Management
- Site Surveys
- RF Modeling and Design
- Consulting Services
- Feasibility Studies
- Carrier Coordination
- Commissioning
- Monitoring, Maintenance, and Repair

Commitment to Safety

HMI extends safety to every aspect of work. Safety drives the development of impeccable work practices and is at the core of the way behavior is observed, communicated, and investigated. HMI follows a daily safety management system of leading and lagging indicators, including coaching observation trends, work site audits, good catch and near miss reports, corrective action follow-ups, total recordable incident rates, days away, and restricted duty and transfers. With these indicators, HMI performs trend analysis and program validation of safety performance. This vigilant evaluation and implementation of company and industry-wide best practices ensures HMI maintains the absolute highest safety standards to protect our workers, our clients, and the community. HMI's daily mission is to ensure "Nobody Gets Hurt!"

About

HMI is a multi-discipline, privately held firm that designs, builds, and maintains the critical infrastructure of the country. HMI brings extensive industry knowledge, technical excellence, and an integrated approach to engineering, planning, construction, project management, and turnkey delivery solutions for the power, oil & gas, and communications industries. HMI works closely with clients to assess each situation and achieve high-quality outcomes on projects of all sizes and complexity.
